

**NEW**  
**MAR-SPEC**

## Floor Coating System

*Can also be used on counters; walls, interior and exterior;  
and a number of other applications*

### A Variety of Colors In A One Shot Application

Mar-Spec is a simple to apply multiple colored floor and wall finish that is elegant, distinctive and appealing for all types of applications.

#### **FLOORS & EXTERIOR**

Use it on floors to create an elegant impression and the depth illusion found in natural granite. You can use it for patios, pool decks, driveways, sidewalks, garage floors, concrete block, stucco, basement floors, laundry and utility rooms, etc. When using it on floors, a clear sealer is necessary. We also recommend adding our "Slip Grip", (a non-skid additive) to the sealer, where a non slip surface is desired.

#### **INTERIOR**

It has the appearance of a more expensive faux finish with a striking balance of colors and textures that is economical as compared to expensive faux finishing and wall coverings. Use it over existing textured walls, painted walls, wallpaper, decorative moldings, columns, furniture, etc., wherever you want a decorative stone appearance. Create a chic distinctive impression of depth, with a variety of colors, limited only by your imagination. It will integrate with most décor and finishes, even wallpaper.

#### **ARCHITECTURAL FOAM**

Introduce a new look for polystyrene (Styrofoam®) columns, cornice moldings, trim moldings, balusters, signs, logos, entryways etc. Create a stunning and distinctive look with our new Mar-Spec. Turn foam into stone, by using our StyroCrete® first and then Mar-Spec, generating an exciting and distinctive appearance of real granite. Don't miss out on this new and exciting market.

#### **ADVANTAGES**

Low per square foot cost as compared to other floor coatings; Ease of application; Tough and durable; Stain resistance; Easy to clean; Long lasting;

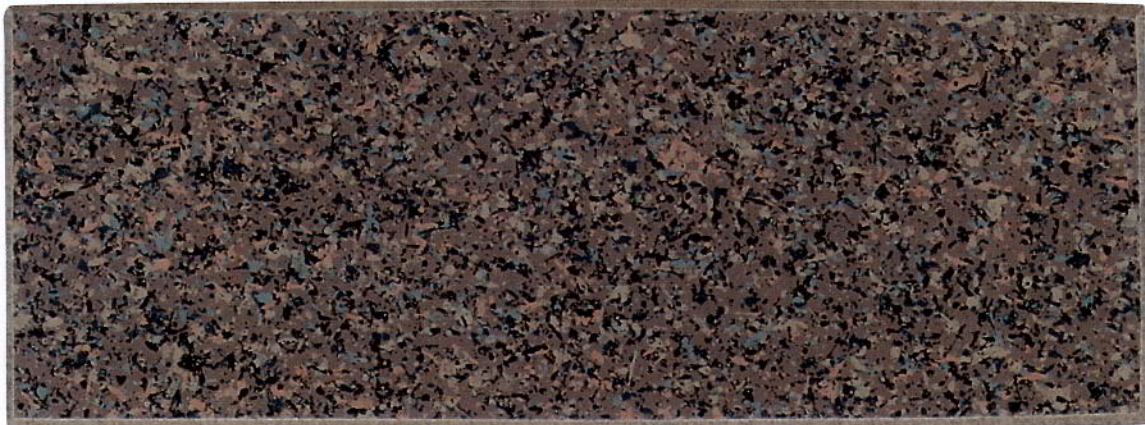

#### **ENVIRONMENT FRIENDLY**

Non-toxic; Low odor; Non-flammable, when used without sealer.
